Executive Summary: This dashboard provides a comprehensive analysis of academic performance across 1,000 students. While the overall passing rate stands strong, a detailed breakdown reveals distinct distribution shifts across different grade bands. This tracking allows us to pinpoint exact areas where targeted academic support can yield the highest impact. Out of 1000 total students, the overall passing rate sits at 71.5% driven heavily by top performance of 5.2% of the class.

**Count of Lunch**

# Based on the AI key influencers analysis, students who have free/reduced lunch or have not completed test preparation show a significantly higher likelihood of scoring below 60 compared to other student demographics.

Key influencers | Top segments

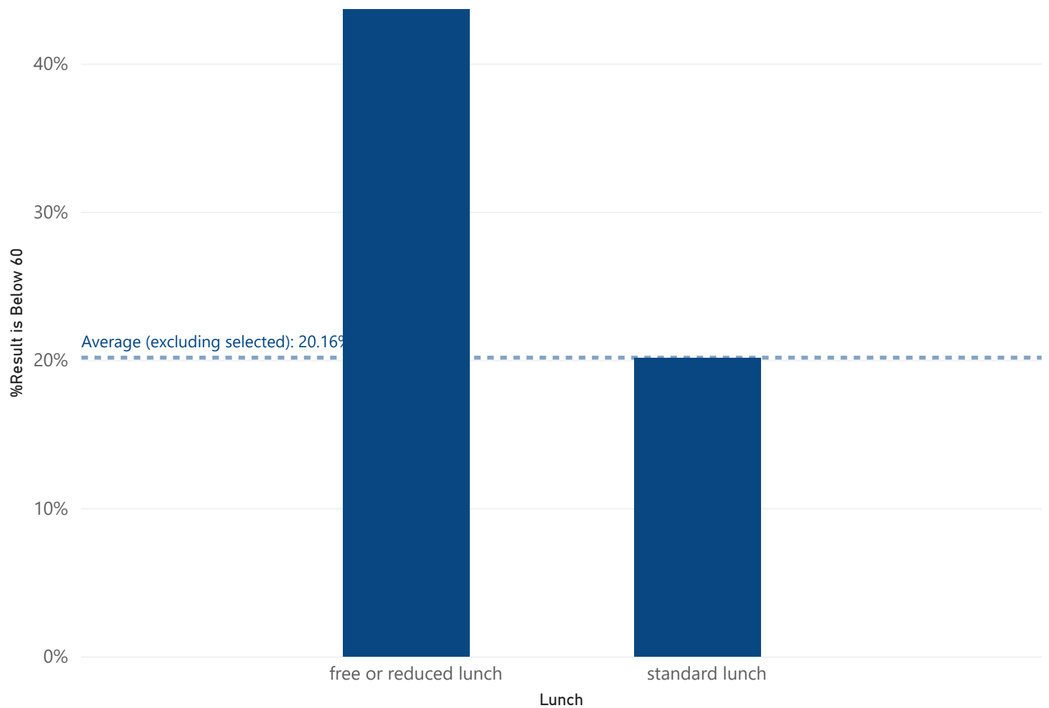

What influences Result to be Below 60 ?

When...

....the likelihood of Result being Below 60 increases by

- Lunch is free or reduced lunch
- Test Prep is Not Completed — 2.09x
- Education Level is High school — 1.49x
- Gender is male — 1.40x
- Education Level is Some high school — 1.33x

← Result is more likely to be Below 60 when Lunch is free or reduced lunch than otherwise (on average).

Only show values that are influencers

1. **"Students average 67.8 overall, and 71.5% score 60 or higher."**
2. **"Students who completed test prep score 7.6 points higher on average."**
3. **"Girls score higher in reading and writing, and boys score higher in math."** *(Verify on Page 2 "Avg Subject Score by Subjects" chart toggled by gender).*
4. **"Average scores rise with parental education, from 65.1 to 72.0."** *(Verify on page 2 "Avg Overall by Education Level" chart running from Some High School at 65.1 to Master's Degree at 72.0).*
5. **"Students with free or reduced lunch average 8.7 points less than those with standard lunch."** *(Calculated directly from  test prep/lunch matrix or field parameter variance).*

## Recommendations

- **Recommendation 1:** Implement a campus-wide initiative to offer subsidized or universal access to test preparation modules, as the data shows students completing the course achieve a substantial **7.6 point increase** in their overall testing averages.
- **Recommendation 2:** Establish targeted academic support and resource interventions for students qualifying for free or reduced lunch programs to bridge the observable **8.7 point performance gap** compared to students with standard lunch access.
